PROJECTS

Personal Website
www.stephensp.com
Personal website for myself and for potential recruiters.
The website will be an ongoing and constant reflection of the skills I have and will pick up in the during my focus on web development languages, technologies, and trends.

Auction Website
spring-2016.cs.utexas.edu/cs105/ssp0929/app-iter-2/index.php
Project website for a PHP/SQL web development course I am currently undergoing. The project loosely follows industry standard guidelines involving usecases, wireframes, simulated client feedback, and a step by step iteration from mock wireframe to a fully featured dynamic web auction product.

Incremental Game
github.com/ssp0929/Incremental-Game
Small javascript-based incremental game I am working on.

Please check my github for other projects.

EDUCATION

The University of Texas at Austin
